

How to take XtendOvite

Tincture: Shake the bottle well to mix the herbs, squeeze the eyedropper filling it with about a half inch of liquid. Remove the filled eyedropper from the bottle, and squeeze the liquid under your tongue.

Take three times daily, recommended as first thing in the morning, supper time and before going to bed, not with food. The taste at first can be quite difficult for some and you could start with say 5 drops per dosage and build up to 15, XtendOvite is also available in capsules. Many customers have told us that the taste is much easier to take after a few days.

XtendOvite tincture is made in a 40 percent alcohol solution base. *Do not refrigerate.*

For those with problems with alcohol, please take XtendOvite in capsule form.

Capsules: The capsules are taken with food three times a day, due to the High Grade Herbs.

Interactions with XtendOvite Use

XtendOvite is made from herbs, which generally do not have the kind of extreme side effects some medications have. For example, Hawthorn may increase the effects of the herb "Digitalis", used in medication like "Digoxin" or "Lanoxin". Generally the homeopathic dosage in XtendOvite, due to the seven herbal combination, each herb is in small amounts and is unlikely to cause side effects.

Also, Garlic and Ginkgo Biloba have blood thinning properties, and this should be borne in mind when taking it with medications. Many have combined

XtendOvite with their regular medication, if your not sure, consult your doctor as you should when taking any vitamin or herbal supplement.

It is advised to inform your doctor about all supplements prior to any operations.

A Message from Don Wiskin

I come from a long line of people dying from heart related ailments. My father was 62 when he died from complications of by-pass surgery, then my 44 year old brother had a heart attack and died. A few months later my mother had a stroke and passed away in her bed. My oldest brother, 53 whom I had not seen in nine years came for the funeral. I said he was looking good, he said I would not believe how bad he felt inside. He died 21 days later upon arrival at the hospital. Then four months later, in June of 1998 I suffered a massive heart attack and lost 35% of my heart to damaged tissue and had a 95% blockage in one of my arteries. The Garlic, Cayenne drops gave me back my life. 7 months after I started taking them, the doctors could find nothing wrong with me and took me off my medication. Since then, I have told as many people that would listen my story and get them to try XtendOvite to help overcome their health challenges.

It makes me feel very good when someone calls to tell me about their experience and how we helped change their life with a few simple herbs.
